SUMMARY & REPORT OF STATUS

[WITH SUGGESTED GUIDELINES]

PROJECT BETA

Investigator - Physicist - Paul F Bennewitz

The following are key mile posts established or discovered during the continuing scientific study concerning Alien intervention and the result. (Study limited solely to New Mexico)

1) Two years continuous recorded electronic surviellance and tracking with D.F.* 24 hr/day data of alien ships within a sixty (60) mile radius of Albuquerque plus 6000 feet motion picture of same - daylight and night.
2) Detection and disassembly of alien communication and video channels - both local, earth, and near space.
3) Constant reception of video from alien ship and underground base viewscreen; Typical alien, humanoid and at times apparent Homo Sapien.
4) A case history of an Encounter Victim in New Mexico which lead to the communications link and discovery that apparently all encounter victims have deliberate alien implants along with obvious accompanying scars. The victim's implants were verified by x-ray and Cat Scan. Five other scar cases were verified.
5) Established constant direct communications with the Alien using a computer and a form of Hex Decimal Code with Graphics and print-out. This communication was instigated apparently after the US base was vacated.
6) Through the alien communication loop, the true underground base location was divulged by the alien and precisely pin-pointed.
7) Subsequent aerial and ground photographs revealed landing pylons, ships on the ground - entrances, beam weapons and apparent launch ports - along with aliens on the ground in electrostaticly supported vehicles; charging beam weapons also apparently electrostatic.

8) Cross correalation and matching by triangulation, etc., to official NASA CIR (color infrared) high resolution films confirmed base locations and resulted in revealing US Military envolvement yielding precise coordinates and the US base layout.

9) Prior alien communication had indicated military envolvment and the fact the USAF had a ship but due to studied alien psychology this was ignored at the time.

10) Subsequently, the alien communicated following verification with the CIR, that there was indeed a ship; actually more than one - that two were wrecked and left behind and another built - this ship is atomic powered and flying. The alien indicated it's basing location.

11) It was learned as stated that two women and a boy near Austin, Texas were exposed to severe radiation at close range and the ship was last seen going West with helicopters. In addition, the US Government was quietly picking up the expenses.

12) Subsequent inspection of motion picture photographs taken during the study revealed the US ship or one like it flying with the aliens. These match the CIR where two can be seen on the ground and in the later photographs taken on the ground after the base was abandoned.

BETTY CASH
VICKI LANDI
LOCATIONS NO OF HOUSTON

So in very brief form the prologue to learning within reasonable accuracy what transpired prior to the end of 1979 or shortly thereafter.

The computer communications and constant interaction with the alien in this manner without direct encounter has given a reasonably clear picture of the alien psychology, their logic and logic methods and their prime intent.

It is important to note at the outset, the alien is devious, employs deception, has no intent of any apparent peace making process and obviously does not adhere to any prior arranged agreement.

In truth they tend to lie, however their memory for lying is not long and direct comparative computer printout analysis reveals this fact. Therefore much "drops through the crack" so to speak; and from this comes the apparent truth.

It is not the intent of this report to criticize or point fingers. Obviously whoever made the initial agreement was operating upon our basis of logic and not that of the alien and in so doing apparently walked innocently, in time, into a trap.

The alien indicated that the "Greys", apparently the group initially envolved in the agreement were still upset about the initial capture and subsequent death of the first eight of their co-fellows.

Another group, calling themselves in the Computer language, the "Orange" - their base is on the west slope of Mt. Archeleta - directly west of the south end of the US base and near NW of the apparent main landing area they call, in the Computer language, "The Diamond". This, because from a distance, it looks diamond shaped in the photographs. when looking somewhat south west past the observation tower toward the ridged peak SE of Mt. Archeleta. This ridged peak has no name, I call it South Peak. The base extends north of this peak to the edge of the cliff down which goes a road past a large alloy dome thirty-eight (38) foot across the bottom and with a twenty (20) foot hole in the top.

Based upon some of the aerial photographs during which the alien was caught in the open and launching - some launches appear to be coming from the direction of the dome. I would guess it is an underground launch egress facility. In the NASA CIR there is what appears to be a black limousine alongside the dome on a ramp. Surprisingly it is precisely the size of my 79 Lincoln Town Car. Wheeled vehicles and what appear to be Snow Cats or Catapillars can be seen throughout the CIR - car and truck tracks, trucks and jeeps. I don't believe aliens have wheels - humans do.

Numerous road blocks extend northward through the US base along a well maintained road thirty some-odd feet wide - apparently gravel - near all weather - numerous turn arounds and wheel tracks into launch preparation areas with the ships; pads marked with twenty-six (26) foot Xs and servicing facilities, tanks, etc. - two domed polygon high voltage buildings on north on the east side of the road, also an apparent foundation for another or a helo pad - test stands, human housing, water tank (thirty-two foot across) - and at one of the main road blocks, two large vehicles parked across the road. Also at that point another apparent black limousine with tracks leading to it to the west of the road. All tracks and vehicles have been dimensioned and match military vehicles. If I were to make a guess, I would estimate the likelyhood that the apparent black limousines are CIA.

This is but a limited inventory of what was there on Sept 8, 1978 - included only as evidential matter for your perusal and confimation. The road, which incidently the natives, the tribal chief, reservation police and highway patrolman know nothing about, comes in off of a trail from the north. Starting at the trail, line of sight to the large plateau area and the alloy dome, the road, in the middle of nowhere on the Jiccarilla Reservation, is precisely 12,888 ft. long airline distance. The total alien basing area, which apparently contains several cultures(now all under the designation "Unity" in the Computer language) is approximately three (3) Km wide by eight (8) Km long. A conservative guess based upon the number of ships presently over this area and the number on the ground in the CIR and photographs, the total alien population at this point is at least two thousand (2000) and most likely more. The alien indicates more are coming or on the way.

I won't attempt to speculate in this report as to how the initial US contact was made - what transpired, nor how many were able to escape. The alien has communicated his account, and if totally true, it certainly is not palatable.

Much detail has been omitted for future discussion if desired - however the import is this. Constant computer communication - full on line in February of this year - manual prior to that - has allowed a constant accounting of what is and has been going on - conditions of morale and a total insight into "what makes the alien run". This is very valuable data.

1) Most importantly, the alien will allow no one to go without an implant and after knowledge of it is wiped out. They simply will not allow it. All indications are that communication or language cannot result without the implant. (with the exception of the Binary and the Computer) This would indicate a possible immediate threat or danger for anyone - military, Air Force, or otherwise that has been at the base. They will not remember the implant in any case (the contactee here included)

   The reason for the implant is multiple for both language or communication by thought (there is no apparent language barrier with thought) and also complete absolute control by the alien through program - by their beam or direct contact.

   I have tested this and found that during this programming the person is totally alien; once one learns to recognize the signs and the person then has no memory of the act/conversation afterward. If this has happened to the military, I need not elaborate as to the possible consequences. The victim's "switch" can be pulled at any time and at the same time they are "walking cameras and microphones" if the alien chooses to listen in with the use of their beams. No classified area of any endeavor in the US is inviolate under these conditions. However - realize - the scars, barely visible - can be seen - all are exactly located and all are accessible by x-ray.

2) Also note that all of the aliens - human, humanoid alike - all must have implants - without them, no direct communication is apparently possible. So one can most generally arbitrarily say that if a person states he/she communicated by thought with an alien - he/she most likely has been implanted. They may also claim to be overly psychic and be able to prove this - again through the link transplant, he/she is given the information by the alien and does not realize.

3) Most importantly, the alien, either through evolvment or because the humanoid is made - will exhibit tendencies for bad logic (bad by earth logic comparison) so they are not infallible - in point of fact they appear to have many more frailties and weaknesses than the normal Homo Sapien. To the alien, the mind is key and therein lies a great weakness which will be discussed later.

4) They are not to be trusted. It is suspected if one was considered a "friend" and if one were to call upon that "friend" in time of dire physical threat, the "friend" would quickly side with the other side.

The computer indicates in comparison, that no known earth protagonist - Russian or otherwise exhibit these tendencies to any major degree indicating the danger involved in making any kind of agreement with these aliens - at least of this species.

5) The alien does kill with the beam generally. Results on a human will exhibit a three to four cm purple circle. If done from the rear, on one or both shoulders. The results on cattle are the same, essentially exhibiting purple beneath the hide, with burned circles on the outside.

6) Cattle mutilations are the other side of the coin and will not be delved into here though they are a part of the overall. It appears the humanoids are fed by a formula made from human or cattle material or both and they are made from the same material by gene splicing and the use of female encounter victim's ovum. The resultant embryos are referred to by the alien as an organ. Time of gestation to full use as a utility, ready to work appears to be about one year. A year in alien time - I do not know.

Solution: I doubt there is an immediate total "cure" per se - however, they must be stopped and we have to get off dead center before we find time has run out. They are picking up and "cutting" (as the alien calls it) many people every night. Each implanted individual is apparently ready for the pull of their "switch". Whether all implants are totally effective I cannot predict, but conservatively I would estimate at least 300,000 or more in the US and at least 2,000,000 if not more worldwide.

Weaponry and Inherent Weaknesses

Weaponry is one of the keys and in the alien's present state we can prepare an effective offense.

One tends at the outset (I did) to look at their machines and say - there is no defense or offense. One is overwhelmed by their speed, apparent capability of invisibility and "cloaking", and other covert capabilities not discussed at this time. In particular - the beam weapons are themselves a direct threat and obviously one that must be seriously considered but not overly so.

Let us first look at just what this weapon is. It is an electro-static weapon with plasma generating voltages - and an internal storage device - it is pulse powered. The beam, totally effective in atmosphere can be loaded with hydrogen or oxygen. Range? Average, ground weapons - maximum two (2) Km if it is dry, capable of sustaining just so many full power discharges - slow leakage occurs continuously,

therefore, they must be recharged periodically. If it is raining the weapon becomes ineffective and is swamped thus discharged. The range is near totally lost at that point.

On the disks and saucers, the weapon is generally on the left side or top center and has a maximum range of two hundred (200) meters at which point it will plow a trench in desert soil. When fired - it fires both to the front and to the back equally. Reason? Because of their mode and methods of flight. If equilibrium is not maintained, the saucer will spin out.

Hand weapons? Estimate based upon visible damage observed, not too much velocity nor staying power but at short range - deadly (less than a .45 cal automatic). At one meter range, estimate of beam temperature 1600°F or higher; it can vaporize metal.

Apparently the disks and weapons operate from a storage source. In time, without periodic recharge, this storage is depleted. The design they traded to us was at least thirty years old - employing an atomic source. Possibly they may still have some - it would appear so - their staying power is obviously much longer.

Aircraft Helicopter Vulnerability

Any of our aircraft, helicopters, missiles or any air flight vehicle can be taken down instantly with no use of weaponry. The alien simply need do no more than make one invisible pass and their bow wave or screen or both will take the air lift vehicle down. The pilot obviously will not even know what hit him.

For human on the ground, the alien can use weaponry or bow wave. The partial pressure envelop can hit with the power of a tornado - shock rise time and G force is instantaneous

However, they dare not hit the craft physically because they are fragile and in fact, under slow flying conditions within our atmosphere, hold a very tenuous position. Without power, balance or equilibrium, they loose it.

In brief - these are apparent capabilities observed and gleaned through the computer communication and observation. You may know of these, however, they are directly related to the last and final portion of this report. What can be done?

1) Because of the alien's apparent logic system (they appear to be logic controlled) a key decision cannot be made without higher clearance. All are under the control of what they call "The Keeper"; yet it would appear this is not the final say. Therefore, dependent upon urgency, delays of as long as twelve to fifteen hours can occur for a decision. How short/long this time frame under battle conditions may be, I do not know.

   Because of this apparent control, individual instantaneous decision making by the alien is limited. If the "plan" goes even slightly out of balance or context, they become confused. Faced with this, possibly, the humanoids would be the first to break and run.

   The same applies to their Mission Master Plan, if one can call it that. If pushed out of context, it will come apart - they will be exposed to the world so they will possibly run before they fight in the open. They definitely do not want that to happen.

   Psychologically, at present, their morale is down - near disintegration. There is pronounced discension in the ranks; even with the humanoids. Communication can encourage this (no necessity to expound upon this other than to say because of their own internal vulnerability mind-wise to each other, therein lies a prime weakness). Inter-echelon or individual "trust" appears to be totally lacking so suspicion of each other is rampant. They are highly segregated as to levels - a "low" dare not conflict with a "medium" or "high" or it literally means death. Death being, to the humanoid, deprogramming or, in the end perhaps total physical death.

They appear to be totally death oriented and because of this, absolutely death-fear oriented. This is a psychological advantage. The computer also gives indications of a real possibility of adverse or "ground programming".

2) Consider their ships - most if not near all run on charge. That source depletes and so dependent upon size - depletion can occur for some within a week or less. Ships can replenish each other but only up to charge balance. This is done with antennae-like extensions and the charge is distributed observing conservation of energy laws. They can replenish from power lines - but again only to a point - so time of flight is limited. Deprived of their base recharge capability, it is indicated that all ships will come down within six months to a year unless they can get transported out - that is back to the prime launch ship.

The disks and saucers in general cannot fly in space because of their mode of flight. Therefore, deprived of home base, it is not likely they can survive. Their capability in power survival outlasts their capability in food or formula survival. It they do not get formula/food within a certain period of time they will weaken and die.

In the case of Mt Archeleta and South Peak, they are dependent upon the Navajo River for water supply and water to them is totally life. Without water they have no power; without power, no oxygen or hydrogen to service the ships and weapons. No water to sustain the organs and feeding formlula.

Simple? Not really. However, there is a water intake and there is a dam upstream that can be <u>totally</u> cut off and the water re-routed to Chama, New Mexico. Should this occur, at least three of the internal bases will go down. They could possibly go atomic periodically but obviously problems without cooling.

Once the bases are pressed on a large scale, all disks and saucers will go airborn immediately. Troops on the ground can gain terrain cover to quite a degree - it is rough terrain.

3) Our need is for a weapon, workable and preferably not like the alien's. I believe unless the alien is caught unawares (with their screen up their weapons are equal so they are like children pillow boxing) there can be no result; the weapon must penetrate their screen and it must also penetrate the ground. I believe I have that weapon. Two small prototypes have been funded and constructed by my Company. Tests conducted to date indicate they do work and work rather well considering their small size. Because of this weapon's present status and proprietary nature (a basic patent is in process), the theory will not be explained here. However, the weapon appears to do two things at very low power. 1) The disks within it's range begin to discharge when exposed to the weapon beam. To counteract, they must apply more power and so doing consume more power. Again conservation of energy laws strictly apply.

This effect can be observed on the detection instruments as they back away in response to slow discharge. Discharge, at low power is slow but at high power in the final sophisticated weapon, the rate can be increased by many orders of magnitude. 2) Most importantly, this weapon can penetrate the screen - hull alloy, everything. They cannot shield it in any way. Lastly, because of the implants, the weapon's beam gets to them mentally; they loose judgement and indidate almost immediate confusion, particularly the humanoids.

It is believed at this early stage - based upon present testing that the weapon when full on, and full size will kill or bring down disks at substantial range. The alien weapons operate substantially the same as their disks using a charge source and charge distribution. So, in the same sense it is indicated that this weapon design will pull their charge weapons down very rapidly.

The range of my weapon exceeds that of their present weapons and in its most sophisticated form can be readily computer controlled to allow extremely rapid tracking and lock-on regardless of speed along with electronic wobbulation of the beam. It is a beam weapon and even at this early stage of miniature prototype testing and development, it indicates eventual superiority to their weapons.

4) Initial logistics would indicate a plan sequentially implemented as follows: This plan does not include all requirements and preparatory safety measures to be employed by the ground force; however, if Air Force Intelligence desires to pursue the approaches suggested in this report, each significant requirement will be discussed in depth.

An attack must be directed near entirety on the ground for obvious reason. One would, if familiar with the alien capability, indicate that vehicle ignition problems will be encountered. This is precisely true; however, the reason for this is not mysterious but is based upon good solid laws of physics and are known. Experience gained through my study, it is now known how to prevent this from happening and will be discussed in detail at some later date. All electrical and electronic equipment must be "hardened" using these specific techniques prior to implementation. Because of the known capability of the alien (by use of scanning beams to know in advance details of planning) only the initial outline is presented in this report.

Again through the communicative interaction with the alien, testing has simultaeneously been done upon this facet, i.e.eavesdropping and ways to abort this capability have been tested and proven.

The program would be instigated in phases. The first phase - planning and logistics - would include continued implementation and testing of the final weapon prototype

thru the pre-production stage. Production of at least fifty minimum quantity should be planned. Additional backup spares should also be included.

On a full time shift basis, it is estimated that at least one year or less would be required to arrive at the pre-production stage. A team would be organized by Thunder Scientific to accomplish this. The key work is now and would be done by an associated company, Bennewitz Labs.,Ltd.

Specific attack phases would be incorporated.

1) The first procedure would be to close the gates of the dam above the Navajo River. This dam would be held closed for the duration. Internal to the one cave, there is a small dam for water storage. It's capacity is small. There is also a discharge outlet downstream that could be closed causing waste water to back-up into the caves. The water is vacumn pumped apparently by some electrostatic means from the river. At close range, the weapon will take out this cabability.
2) Once deprived totally of water for a minimum period of four weeks, conditions in the alien bases under discussion will have badly deteriorated. Psychological shock is extremely effective with the alien; total advantage can be taken by instantaeneous action or planned observable deviation from the norm. At least three bases will go down.
3) If they follow their normal strategic pattemas when pressed previously, they will launch most if not all ships.
4) Prior to the implementation of water deprivation, the weapons should be deployed at strategic hardened locations and activated in a certain pre-planned manner determined by final weapon coordinate locations.
5) This will put an immediate power drain upon those airborne and the alien weapons ringing their bases.

6) Because of the inherent psychological aspect of the alien, much can be done in the open with no attempt to preserve secrecy. Much of what is done can be of a diversionary nature. Under most conditions they will attempt to harass but will not openly attack.

7) Throughout and prior to this, the open computer communications link will be operational for continued psychological interrogation.

8) At some point in time - again resting upon battle status, the deployment of offensive forces will begin. This deployment should be done in a near instantaeneous manner under certain special conditions that can be discussed.

9) The weapon system should be kept powered up throughout. In this manner, the disks will be made to stay airborne. They cannot land in the interval the system is powered.

10) When the weapon is used in one specific power mode, in addition to continuous discharge on the disks that are airborne and the ground based weapons, the mind confusion and disorientation will build in those personnel at the base and underground. At the end of four to five weeks or less, all weapons should be totally discharged and power out on the bases. Most personnel if not all, will be totally incapacitated. The feeding formula will be down and it's critical processing ruined. All embryos should be dead and all hydrogen and oxygen consumables depleted.

11) Based upon data gathered on the miniature prototype weapons, the full power weapons should have no problem holding off the disks. In many cases some will break within the first forty-eight hours without being directly hit.

12) At that point, standard weapon technology and logistics can come into play and used to the extent of destruction desired at the direction of those in charge.

13) The communications can be used throughout to determine status and near the end to attempt to instigate surrender. If no response results, then they should simply be closed in and waited out.

Summary

It is important to note that the initial implementation of the computer communications was not instigated for the purpose of talking to the alien for the "fun of it"; but was deliberately instigated to use as a tool to study, in depth, long term without physical confrontation, the strengths and weaknesses of the alien.

The weapon theory and prototypes were built to capitalize upon and test the two key and prominent weaknesses discovered. This in-house funded program has been expensive, in excess of $200,000; done on behalf of our nation and handled in the best representative manner humanly possible.

1) The prime and weakest area discovered, probed and tested is exactly what they have used thinking it is their key strength - that being, the manipulation of and control of the mind; not only of command but also humanoid. Manipulated in reverse psychologically and by the language (computer) and due to the extreme of mental distortion and incapacity caused by the weapon, it has been found that this facet is for them a disaster and a directly vulnerable integrated weakness.

2) Though their ships are magnificent, they are also weak - solely because of their method and unique mode of flight. They do not have a stable fighting platform. Charge distribution can also be discharged. The weapon does this - even in it's present miniature prototype stage.

It is not the purpose of this report to imply that the overall problem will be solved with the capture of these bases. Obviously it will not, but it is a firmly based beginning with a high degree of rated projected success ratio. It is not intended to imply the alien will not fight; they may - though their inclination is generally the opposite - this basing area is key. Without it, their mission is in very deep

trouble. It is noted that these are not the only bases on earth there are others. With a conservative estimate using typical logistic support numbers, it is not unrealistic to say there are 50,000 aliens within the ecosphere of earth and near space.

Some of us will be lost in the endeavor that is obvious - however, done now the advantage is gained along with new additional technology to prepare for the next stage.

The key to overall success is - they totally respect force. And with them, the most effective method is to stubbornly continue to pick and pull at their defense with no letup. Faced with the total loss of a base that has taken years to construct, it is believed that their mission will be grossly weakened and badly slowed.

As Americans, in this particular instance, we must realize - that we in this case cannot rely upon our inherent moral principles to provide the answer. Negotiation is out. This particular group can only be dealt with - no differently than one must deal with a mad dog. That method they understand. They have invaded our country our air and they are freely violating the personal and mental integrity of our people. Therefore, in eliminating this threat most certainly we cannot be called the "aggressor", because we have literally been invaded.

In final conclusion A) They cannot under any circumstances be trusted. B) They are totally deceptive and death oriented and have no moral respect for human or human life. C) No negotiation, agreement nor peaceful compromise can be settled upon in any way. D) No agreement signed by both parties will ever be adhered to nor recognized and respected by the alien, though they might attempt to make us believe otherwise. E) Absolutely no quarter can be allowed under any circumstances. Once the offense is instigated, it cannot be abandoned. If it is, reciprocal reprisal will immediately result. They must be made to come down - destruct themselves which is a standing order if the ship is failing or leave earth immediately - no leeway of any kind can be allowed nor tolerated.
